Junior Web Developer & Freelance Web Designer

A motivated self-starter looking to expand my existing coding skills base following the completion of my web development diploma. I love writing beautiful code & learning new ways to work more efficiently. I am a committed hard worker that works to see every project that I take on reach its full potential in every facet.

TECHNICAL EXPERIENCE

Languages:	HTML5, CSS3, SASS, Javascript, PHP, SQL, Python, Jinja, Django, Node.js, SVG
Libraries:	jQuery, Laravel, Bootstrap
Databases:	MySQL
Software:	Sublime, Visual Studio, Sketch, Adobe Photoshop, Zeplin, Google Docs, Github
CMSs:	Wordpress, Squarespace, Wagtail

WEB DEVELOPMENT WORK EXPERIENCE

Springload: *Junior Front-End Developer* - May 2017 - Present   springload.co.nz

- Maintaining the Kiwibank website, one of Springload's most important clients is my main task. This involves using a number of different languages, strict deadlines and clear communication. This included some responsive development elements
- Performing front-end updates on a number of other client's websites that are built on a CMS called Wagtail
- Creating HTML email templates using Campaign Monitor
- Helping to resolve bugs on Github & keep the Springload documentation up to date
- Liaising with a number of different teams including Development, Client Services, Content & Design Teams

Lifeline Aotearoa: *Web Development & Design* - Mar 2017 - August 2017   lifeline.org.nz

- Part of a two person team we redesigned and rebuilt the crisis helpline charity's large website to update their online presence and increase donations
- The new site was constructed using Wordpress to create a long-term, easily updatable web solution with a reliable CMS. This site is compatible with third party payment processor Flo2cash

Advice Unlimited: Web Development & Design - Aug 2016 - May 2017   adviceunlimited.nz

- Working as part of a small team to provide technological solutions for small to medium sized businesses
- Using Content Management Systems such as Wordpress & Squarespace to design quick and affordable online platforms in collaboration with a graphic designer and copywriter

ADDITIONAL RELEVANT WORK EXPERIENCE

Kiwibank Ltd: *Phone, Online and Migrant Customer Service roles* - May 2011- April 2015
Prior to studying at Yoobee and my pre-house purchase 12 month overseas working holiday, my final role at Kiwibank as an Online and Migrant Banking Representative involved the redesign of the following webpage content and all attached forms while looking after this important channel almost independently; https://www.kiwibank.co.nz/personal-banking/international-services/moving-to-nz/open-acct-overseas/

EDUCATION   ONLINE PORTFOLIO | jennyadamsnz.github.io

Yoobee School of Design - *Diploma of Web Development*
Victoria University of Wellington - *Bachelor of Arts* - Majoring in International Relations & Media Studies

STUDENT PROJECTS

Rent Rave - A currently fictional designated online space for renters to share helpful information about rental properties in the form of online reviews, thereby acting as a "Tripadvisor" for renters in NZ. I came up with this idea as a renter a few years ago which partly inspired my interest to study web development. I am considering properly launching this website idea in the future if existing Dunedin-based competitors ratemyflat.org.nz don't expand nationwide . It uses PHP, HTML, CSS, SASS and an auto-address completion Google API

Wellington Free Walking Tour - A website to advertise a currently fictional tips-based walking tour in Wellington City. This idea was inspired by some fantastic walking tours I joined while on a 12 month working holiday in Europe between Apr 2015 - Apr 2016. This is a fully responsive website using HTML, CSS, SASS, Javascript & a Google Maps API with navigation options for devices with GPS capabilities
